Inland Wetlands and Watercourses Commission
Town of Goshen Connecticut
42A North Street
Goshen, CT 06756

April 30th 2024

Dear Commission Members,

Please consider asking the Town of Goshen's Public Work's Director, Garrett Harlow and our First Selectman Todd Carusillo, to resubmit the inland wetlands and watercourses application for 190 Sharon Turnpike. A municipal building, especially one slated for 190 Sharon Turnpike, should also be honored a public hearing. A public hearing would allow neighbors and individuals surrounding the project time to speak and time to be informed on the slated project.

This is a *new* planning and zoning site plan application that was accepted last week at P&Z. Although the building may be slightly "smaller" in comparison to the last one, it is a *new* site plan, thus should have a *new* inland wetlands and watercourses application.

There has been controversy surrounding 190 Sharon Turnpike, lets squash the chatter and do our due diligence. Require Garrett Harlow and the Town of Goshen to reapply for their inland wetlands' approval. New site plan, new approval. Simple.

Sincerely,

Sarah & Mike Leonard
